

Project Plan - Sports Teams

The purpose of this database is to let the user know about some basic information about the sports teams that the publisher of the website follows. The user is able to add any sports teams along with some basic information about it into the database. This would allow the user to understand the team name, the year they were founded, as well as some of the current key players on the team (may not necessarily mean best, but an athlete with a lot of impact on the team).
